

4.41478 – Survey of Linguistic Theories – Course Outline

Lecturer: **Olga Temple**
Linguistics and Modern Languages Strand
Office: KD 231, Ext. 136
sttemple@upng.ac.pg

Course Description

This is not a course in Historical Linguistics – this class is on the *history of human study of language*. So, we'll be looking at how our *ideas about* language have changed, not at how languages change in time. We begin our survey of human understanding of language over the past three thousand years with an overview of Ancient Indian, Chinese and Greek thought on language and its role in society. We will then travel through the ages, focusing mainly on European and American linguistic thought, and ending up with a review of current developments in linguistics.

Objective

This course seeks to provide a three-dimensional view the history of linguistic enquiry. It is hoped that upon the completion of this course the mature students will be able to formulate their own understanding (approach to) the study of language.

Outcomes

You will gain an in-depth understanding of the history of linguistic theory; these insights will help you formulate your own informed opinion of what human language and its role in society are.

Contact 45 hrs (2 lectures and 1 tutorial per week)

Prerequisites 4.11406 ~ Introduction to Linguistics

Assessment

Tutorial assignments - 60 %

Final examination - 40 %

Recommended Texts

Robins, R. H. (1997). A Short History of Linguistics. (Longman Linguistics Library)
Handouts of lecture notes will be provided

Program
